Free Aussie Rivals Pack Headlines Significant Update 2.1 for Project Motor Racing

- Free Aussie Rivals Pack DLC launches today: [Watch the launch trailer](#)
- Update 2.1 delivers major quality-of-life, immersion, and visual improvements
- Fully rebuilt GT4 and GT3 classes and improved collisions
- Join-in-Progress, triple-screen Alpha support, and VR configuration options

Publisher GIANTS Software and developer Straight4 Studios today launch the free Aussie Rivals Pack, bringing the 2013 Holden Commodore VF and a completely reworked 2013 Ford Falcon FG to all players as part of a significant new update for Project Motor Racing.

Update 2.1 delivers major improvements across content, physics, online racing, immersion, presentation, and close-quarters racing. Alongside the new free content, players can expect a complete rebuild of the GT4 and GT3 classes, a phased Join-in-Progress rollout, Alpha triple-screen support, further PC VR enhancements ahead of a late-summer release, improved collisions, a new Ranked Notification Join feature, and graphical enrichments throughout the game.

The Free Aussie Rivals Pack

The free Aussie Rivals Pack brings one of touring car racing's great rivalries to Project Motor Racing: Holden versus Ford.

The pack includes the 2013 Holden Commodore VF and a completely reworked 2013 Ford Falcon FG, giving players two modern V8 touring car icons built for kerb-hopping aggression, rear-wheel-drive attitude, and elbows-out racing.

GT4 and GT3 Class Handling and Physics Overhaul

Guided by new CCO Aris Vasilakos, Update 2.1 delivers a full car-by-car GT4 and GT3 rebuild from the wheels up, using new manufacturer-derived data alongside a complete tyre simulation remake to improve handling feel, tyre behaviour, and class authenticity.

Quality of Life Improvements with Update 2.1

- Join-in-Progress. Players are now able to join supported online sessions after they have started, making it easier to connect with friends, communities, leagues, and public races without waiting for the next full restart.
- Ranked Notification Join. Players registered for a ranked session no longer need to stay on the registration screen while they wait. Once registered, they can return to other areas of the game. When the ranked session is ready, a notification will appear, allowing them to join directly from wherever they are.

Immersion & Display Support

- Triple-Screen Support Enters Alpha. For dedicated sim racers, triple-screen support arrives in Alpha, giving multi-monitor players an early version of one of PMR's most requested immersion features.
- In-game configurations options in UI for VR are now available.

Racing, Hardware & Visual Improvements

- Improved Close-Quarters Racing. Collision behaviour and multiplayer stability have been refined to make wheel-to-wheel racing more consistent.
- TRUEFORCE has now been enabled on all platforms.

A Long Way Since Launch

"Players have been putting in the laps, giving us the feedback, and pushing us to make PMR better," said Kevin Boland, CEO at Straight4 Studios. "Update 2.1 is the result of that process: a major GT4 and GT3 overhaul, cleaner racing, better online flow, stronger immersion features, and the free Aussie Rivals Pack, delivered as a big thank you to our community that continues to inspire and shape Project Motor Racing."

Project Motor Racing is available for PC, PlayStation® 5, and Xbox Series X|S. A Year 1 Season Pass is available separately – fans save up to 30% compared to buying all content separately. Free mods are released as user-generated content on the official UGC Portal. About GIANTS Software

GIANTS Software is a globally operating game developer and publisher headquartered in Zürich, Switzerland. Established in 2004, the company is known for creating the popular Farming Simulator franchise. With international teams, including offices in Erlangen (Germany) and Brno (Czech Republic), GIANTS Software develops and publishes simulation experiences worldwide. Beyond Farming Simulator, it is strengthening its position in the genre with Project Motor Racing and a global network of partners and industry ties. For more information, visit the [GIANTS Software](https://giants-software.com) website.

About Straight4 Studios

Straight4 Studios features many of the key talents that have shaped SimRacing's heritage for over two decades. With over 20 years' worth of remote work experience and working from three continents, Straight4 Studios' veteran staff have earned dozens of industry awards. Merging the passion for motorsport and values derived from the SimRacing community with the precision of a new, AI-driven physics engine and cutting-edge graphics, Straight4 Studios is hard at work developing the next generation of AAA-racing simulation.
